

General Plan 2020
May 27, 2009 Public Meeting

Comment Cards: What top three issues/concerns did you hear today?

Stormwater Control Comments:

(Some respondents numbered their priorities; others did not.)

#2 Be flexible and open minded regarding water quality treatment to promote visual quality – do not adopt Austin approach

#2 Trash capture in storm water pipes to keep creeks beautiful should be required.

#4 Natural drainage (near S&W hospital)
- Does City of Round Rock have plan map yet?

#2 Transportation / Water / Waste Water

#2 Reduce water use on commercial developments through rainwater harvesting incentives.

Water:

- Encourage requiring water collection areas be beautified as Scott and White did.
- Using wastewater for lawns, etc.

Storm Water:

1. Look at possibility of capture and reuse at some peak rainfall events, i.e. diversion of run off from streams to improvement areas.
