

# Police Activity in Remington Heights Subdivision, May 2009 through October 2009

## NOTES

This map shows the streets that are included in the analysis. Louis Henna Boulevard is shown only as a reference point.

The data source for this analysis is the Police Department's Computer-Aided Dis-patch (CAD) database, meaning these data are drawn from information police dis-patchers enter into the computer as calls occur. The primary limitation of these data is that they may not reflect the actual nature of a call or its true final disposition. Thus, some care should be exercised in interpreting the results presented here.

Traffic stops and animal-related calls are screened from the analysis.

Any questions regarding these results or the report's preparation can be directed to:
