

# 2010 Census Profile

City of Round Rock, Texas

The **decennial Census** is a 100% count of all persons living in the United States and its territories on April 1 of the Census year. Because it is used primarily for Congressional apportionment and redistricting, it is relatively short, including only the figures given below. Figures differ from the American Community Survey (see reverse) because the ACS is derived from a sample of residents, and the Census is a 100% count of all residents.

# 2014 American Community Survey Profile

City of Round Rock, Texas; 2014 One-year ACS

The **American Community Survey (ACS)** includes many items relating to age, households, income, and employment. Because it derives data from a sample, the ACS provides more current information but is less precise than the decennial Census (see reverse).
