

## Geotechnical Engineer's Concurrence Letter

Note: Please submit on company letterhead. Must be signed and sealed by the licensed Geotechnical Engineer who certified the pavement design.

(Date)

Development Services Manager  
City of Round Rock  
301 W. Bagdad Avenue, Suite 140  
Round Rock, TX 78664

**RE: Geotechnical Engineer's Concurrence for (Project)**  
**(Permit No. – for example SIP1200-0000)**

Dear Development Services Manager:

Please accept this letter as the Geotechnical Engineer's Concurrence in regard to the pavement design for the above referenced project. I concur that I (or my designated firm representative) performed an inspection of the subgrade prior to any placement of base as specifically required by the City's Design and Construction Standards [Transportation Criteria Manual, Section 3.2.0 & Standard Specifications Manual, Section 201.3].

Further, I hereby certify the approved pavement structure has been designed for a cross-section that is appropriate for the soils conditions and meets all requirements of the City of Round Rock Code of Ordinances and Design and Construction Standards, including the goal of a twenty year life cycle for all City streets, with no exceptions.

Sincerely,

(Geotechnical Engineer with accompanying seal and date)
