Date

[1] WAM is dollar-weighted average maturity based on stated maturity dates.
[2] Change in Market Value is required data, but will primarily reflect the increase or decrease in the City's par value of Investments held from quarter to quarter.

City Portfolio

As of September 30, 2015

ROUND ROCK TEXAS
FINANCE

- The portfolio is constantly reviewed for optimal asset allocation and a controlled average maturity because a diversified portfolio can better adjust to volatile market conditions.
- The extremely low short-term rates make diversification difficult and they are reasonably expected to continue now at least through 2015. Longer term rates have moved lower and do not provide reward for extension risks.
- Banks remain *uninterested* in new deposits and although state and local bonds continue to add value they have been discovered and are declining in yields.
- Portfolios are cash heavy as we struggle to find value with a flat yield curve which provides little value under six months.
- The non-cash portion of your portfolio is yielding 0.55%.
