The proposed site plans will indicate trees to remain and those to be removed. All trees within an approved building site which are required to be preserved in accordance with the Code must be flagged and encircled with protective fencing. The fencing must extend beyond the full spread on the tree's branches to reasonably ensure successful protection. Existing trees in parking areas will be saved in groups and as specimens whenever practicable.
- c. **Open Space:** All areas not containing buildings, structures, parking lots, sidewalks, fountains, site furniture or other improvements, including, but not limited to, front, side and rear building set back areas, and all areas between the curb line and the property line, must be planted, landscaped, and maintained in good condition. The landscape planting design must provide for easy maintenance. Utility easements will be landscaped consistent with other landscape areas where allowed by the respective utility company.
- d. **Rights of Way:** Areas within the road right-of-way may be landscaped only in accordance with a license agreement with the City.

- e. **Grass:** All landscaped areas not in groundcover or shrub beds will be planted in grasses, preferable sod. Overseeding in fall with cool season native grasses is allowed. The use of edging material to separate all grass areas from shrub and groundcover areas is required. The edging material will be concrete, steel, brick or stone. No plastic edging is allowed.
