5.1. Purpose of Plan

The purpose of the Plan is to provide a mixed-use development including retail, office, restaurant, entertainment, education and residential uses. **Exhibit "B"** illustrates the location of the Plan area in relation to the adjacent existing and planned facilities.

5.2. Use Districts

The Avery Centre land uses have been divided into two use districts: MU (Mixed Use), containing approximately 540 acres, and RES (Residential), containing approximately 310 acres, as depicted in **Exhibit "C"**. The MU District has been further subdivided into eight sub-districts (Nos. 1, 2, 3, 5, 6 & 6-A, 7, and 9). The RES use District has been further subdivided into three sub-districts (Nos. 4, and 8 & 8-A). The remaining area is designated for floodplain or as a reserve area for future right-of-way.

The MU portion of the Plan allows primarily retail, high density residential, entertainment, restaurant, educational and office components. Design requirements dictate that all the uses be oriented to the street and linked together by pedestrian elements such as walking trails, pedestrian plazas and storefront sidewalks.

The RES component of the project allows primarily single family detached structures and attached residential structures. The design requirements include a network of open spaces containing parks, civic greens, greenbelts and trails. For each project, items such as architectural elevations, material sample boards and color samples shall be submitted to the ARC for their review and approval. An approval letter from the ARC shall be submitted with the corresponding applications to the City for site development and building permits. The approval of the ARC shall not take the place of any and all required submittals to the City, County or other governmental agency as necessary to receive regulatory approvals.

9. TRANSPORTATION

9.1 Traffic Analysis

- (1) A Traffic Impact Analysis Update (“TIA-2008”) was prepared by Robert J. Halls and Associates in October 2008 and it was approved by the City. The roadway cross sections for the street types in the Plan area are in **Exhibit “E”**. The street layout plan for the Plan area is in **Exhibit “F”**.
- (2) Site plans and or plats within the Plan area will be evaluated by the City and compared to the land uses evaluated in TIA-2008. If the City determines that the proposed land use(s) indicated on the site plan or plat substantially conform(s) to the use(s) evaluated in TIA-2008, such site plans or plats shall be determined to be in compliance with TIA-2008.
- (3) If the City determines that a proposed land use(s) represent(s) a substantial increase in traffic trip generation (20% or greater) than what was anticipated by TIA-2008, or would require a significant change to the roadway cross sections or the street layout plan in **Exhibit “E”** and **Exhibit “F”**, the City may require the preparation of an additional Traffic Impact Analysis (TIA). City approval of this additional TIA and any necessary revisions to **Exhibit “E”** and **Exhibit “F”** would be required prior to the proposed land use(s) receiving site plan or plat approval.
- (4) For those uses which are deemed to represent a substantial increase in trip generation as compared to the approved TIA-2008, mitigating factors which may be considered by the City in determining the need for an additional TIA may include the use(s) on adjacent lots, if those uses produce less trips than were anticipated in TIA-2008. While these factors may be considered for adjacent lots, in no case shall traffic trips be “transferred” from one side of A.W. Grimes Boulevard to the other.

9.2 Road Cross Sections

Due to the pedestrian oriented design and emphasis on street trees, the roadway cross sections for the PUD require deviations from the City’s adopted standards. **Exhibit “E”**, pages 1-7 contains the alternate roadway cross sections for use within the PUD. The roadway cross sections will be otherwise governed by the City standards, as contained in the City’s Transportation Criteria Manual.

9.3 Gulf Way / Medical Center Parkway Construction Requirements

The intersections may also be treated with alternative paving including stamped or colored concrete.

10.4 Sidewalks

- (1) A minimum of eight feet (8') of obstruction free sidewalk shall be provided between a commercial building in an MU sub-district and a landscape area or street tree, exclusive of tree grates. This does not apply to Seton Parkway, the east side of College Park Drive and Medical Center Parkway, as noted in the roadway cross sections contained in **Exhibit "E"**. If a covered outdoor

Entertainment	10%	40%	100%	80%	100%
Others	100%	100%	100%	100%	100%

Avery Centre shall be allowed to employ these national standards once the project land uses are defined for specific projects within the community, if calculations result in a reduced parking requirement from the provisions outlined in Table H.1.
