

REVISED CITY POPULATION ESTIMATES

The City of Round Rock produces monthly population estimates based on housing units, occupancy, and household size using the most recent decennial Census as a baseline. The decennial Census is a 100% count of all persons in the US produced for the purpose of informing political redistricting.

The revised population estimates are below. The first line is the 2020 Census count, the others are city-generated estimates of population within the city limits. Estimates reflecting newly completed single-family units are added monthly. Estimates reflecting newly completed multifamily units (indicated with an asterisk) are added quarterly in January, April, July, and October.

DATE	POPULATION ESTIMATE
April 1, 2020	119,468 (Census)
May 2020	119,559
June 2020	119,670
July 2020*	120,218
August 2020	120,327
September 2020	120,448
October 2020*	121,980
November 2020	122,061
December 2020	122,145
January 2021*	122,557
February 2021	122,586
March 2021	122,625
April 2021*	122,827
May 2021	122,898
June 2021	122,930
July 2021*	123,391
August 2021	123,443
September 2021	123,497
