Irrigation System Information

Water Meter(s) Number	Irrigation Only? Yes/No	Backflow Prevention Device Type

Controller(s) Brand & Model	Location on Property	# Zones	Working Rain/Freeze Sensor? Yes/No

The following requirements must be met to Pass Inspection:

- Each controller must have a working rain/freeze sensor.
- All running program(s) must adhere to current watering schedule or no more than twice per week in non-drought times.
 - *Drip zones are not exempt from the watering schedule.*
- Water meter must not indicate a water leak or constant water flow.
- The irrigation system must comply with the City of Round Rock Water Waste Ordinance, which does not allow the following:
 - A controllable leak, including broken or leaking sprinkler head or nozzle, a leaking valve, and leaking or broken pipes;
 - Overspray, which may cause water to run off a property or to pond on an impervious surface, or
 - Head(s) that are misting due to high water pressure.
