This listing provides a general overview of City of Round Rock Pool Rules. Each facility has rules and regulations unique to its features.

Lifeguards and Pool Management are the ultimate authority in the pool area and are trained in safety protocols at each facility.

Facility Management's direction should always be adhered to. Failure to follow direction is grounds for ejection from the facility.

The role of a lifeguard is to enforce rules/regulations and respond to emergencies. Parents are ultimately responsible for the safety of their children.
