

# VISUAL PREFERENCE SURVEY INSTRUCTIONS

---

The purpose of this activity is to gauge preference for types of buildings and land uses in different areas of downtown. Your participation will assist the City in evaluating the current zoning and development regulations of downtown mixed-use zoning districts.

The following boards will each contain one map and a series of images.

For each image, imagine that the building shown is located in the geographic area shown on the map.

If you think the building type is suitable for the location, please place a green dot sticker in the box to the right of the image.

If you think an image is not suitable for the geographic area shown, do not place a sticker in the box.

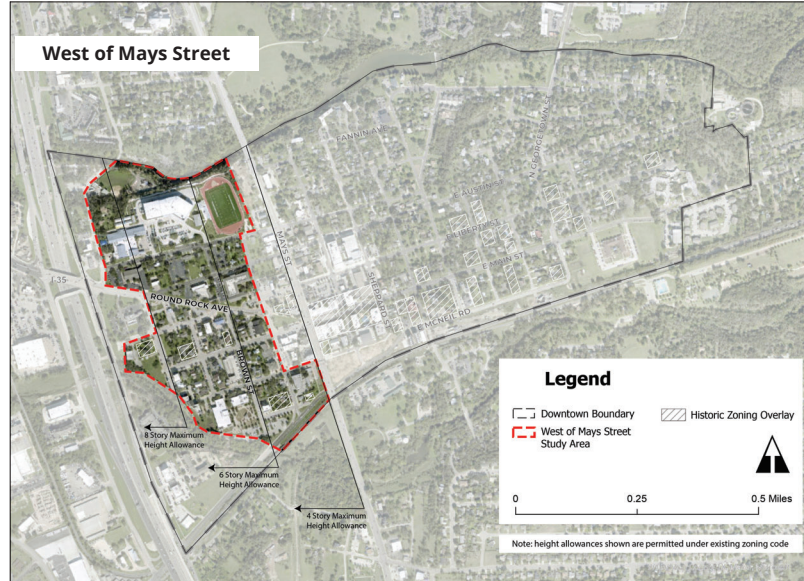

**Please focus on the geographic area shown on the map rather than placing stickers next to the buildings that you like.**

Optional: provide additional comments on any images in the corresponding response handout. Each image and corresponding comment box are identified by the letter and geographic area shown on the board.

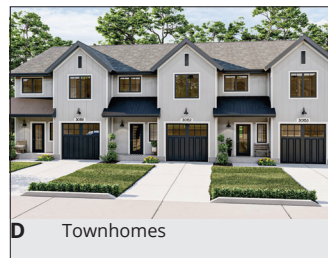

## West of Mays Street

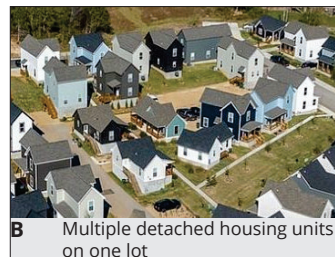

For each of the images shown, determine whether or not you think the building shown would be suitable for the geographic area marked in red below. Place a green sticker in the box to the right of every image that you feel would be suitable for the geographic area shown. Do not place a sticker next to images you think would not be suitable.
