

Setting Run Times on Your Rain Bird ESP-Me Irrigation Controller

1. Turn dial to SET STATION RUN TIMES.
 - Display will show “Station 1” and 0:00. This is the station (or zone) 1 and how many hours or minutes it will run.
2. Push + button to add time or – button to decrease the time. The numbers shown are minutes being added or subtracted.
3. Move to Station 2 by pushing right arrow (→).
 - Push + or – to add or subtract time.
 - Continue repeating these steps until all needed stations have been set up.
4. Turn dial to AUTO RUN. This will allow the controller to start running the schedule. You can also turn the dial to OFF to keep the irrigation turned off. Having it on OFF does not erase what you’ve just programmed in.
