

### Tax Free on Water-Saving Products This Memorial Day Weekend!

During this annual event, you can purchase a wide range of qualifying water-efficient and water-conserving products **tax-free**.

- **WaterSense Items**- weather-based controllers and rain sensors.
- **Water-Conserving Products:** drought-tolerant plants, mulch, soil, compost, rain barrels, and drip-irrigation hoses.
- Qualify when purchased in person for use at a residential property.
- No exemption certificate is needed.

Visit [comptroller.texas.gov](https://comptroller.texas.gov) for more info

### 265-Gallon Rain Tank Promotion!

Looking to collect even more rainwater? Round Rock residents can now purchase 265-gallon rain tanks at a **discounted price** through this special promotion. Plus, City water customers may qualify for a **rebate** to maximize their savings!

- Two color choices – Mocha and Dark Green
- 265-gallon capacity
- \$875 each (no limit on quantity you may purchase)
- 5-ft, 4-inches tall and 2-ft, 1-inch wide.

Pre-sale is now open and offer ends **June 20th**.

### New Landscape Rebate for Parkway Strips!

Parkway strips are inefficient places to maintain turfgrass. Traditional spray irrigation often results in water waste, with overspray hitting the sidewalk and street instead of the grass.

Receive **\$1 per square foot** when you replace healthy lawn with native, drought-tolerant plants or rockscapes! Irrigation in that area must be converted to drip or removed, which includes **additional rebates**. Pre-approval required!

Email us for questions:

### Outdoor Watering Tip 💡

When you turn your sprinkler system on, set it to water **only one time per week** for the spring. It's best to start low now when temperatures are still cool. As the summer heat rises, and if your yard looks stressed, then add on the second day to water.
