Commercial Gas Test Inspection Requirements

Atmos Energy and the City of Round Rock require a gas test inspection when gas service has been disconnected for 90 days or longer. To restore gas service, the following steps must be taken:

1. **Submit a Permit Application:** Hire a licensed master plumber to submit a gas test permit application through the City's permit portal at https://permits.roundrocktexas.gov.

2. **Pay the Permit Fee:** The plumber must pay the applicable permit fee, which is based on the total cost of the work being performed.

3. **Schedule Inspection:** The plumber must schedule **BOTH** the gas test inspection **AND** the gas service inspection through the City's permit portal at https://permits.roundrocktexas.gov. Requests submitted before 4:00 PM will be scheduled for the next business day. Requests submitted after 4:00 PM will be scheduled for the second business day.

4. **Prepare for Inspection:** The gas piping must be properly prepared and accessible for inspection before the scheduled inspection date.

5. **Inspection Approval & Service Release:** Once the inspector completes and passes the required inspection, our office will notify Atmos Energy that gas service may be released. **Note that our office has no control** of how quickly Atmos Energy releases service to the site.

Please ensure all required steps are taken to avoid delays in restoring gas service.
