

Residential Gas Test Inspection Requirements

Atmos Energy and the City of Round Rock require a gas test inspection when gas service has been disconnected for 90 days or longer. To restore gas service, the following steps must be taken:

1. **Submit a Permit Application:** Hire a licensed master plumber to submit a gas test permit application through the City's permit portal at <https://permits.roundrocktexas.gov>.
2. **Pay the Permit Fee:** The plumber must pay the applicable permit fee of \$50.00
3. **Schedule the Inspection:** The plumber must schedule the gas test inspection. Requests submitted before 4:00 PM will be scheduled for the next business day. Requests submitted after 4:00 PM will be scheduled for the second business day.
4. **Prepare for Inspection:** The gas piping must be properly prepared and accessible for inspection before the scheduled inspection date.
5. **Inspection Approval & Service Release:** Once the inspector completes and passes the required inspection, our office will notify Atmos Energy that gas service may be released. Note that our office has no control of how quickly Atmos Energy releases service to the site.

Please ensure all required steps are taken to avoid delays in restoring gas service.
